**Dear applicants for higher education,  
graduate students, young scientists!**

Today, scientific research is becoming a necessary component of the formation of a highly educated specialist, an integral condition of Ukraine's integration into the European educational space. The young generation of future and young scientists has a special mission - to carry out research aimed at finding new original ideas, innovative inventions, obtaining and using new knowledge and achievements in practice.

Publication is the result of research, which is an extremely important and responsible step for a young scientist.

**The purpose of the conference** is to publish the results of research carried out by applicants for higher education, graduate students, young scientists on current issues of modern psychological and pedagogical science, and methodological aspects, exchange of practical and research experience.

We invite applicants for higher education, graduate students, young scientists to take part in the **II All-Ukrainian scientific-practical conference (with international participation) "Trends in the development of preschool education: youth and science."**

**The main directions of the conference:**

1. Development of soft skills: creative potential of a preschool child
2. Educational childhood: advanced technologies and modern practices

3. Education of preschool children in the conditions of inclusion.
4. Continuity of preschool and primary education: modern context
5. Values of national and cultural identity: reserves of harmonious development of the child
